RADIAL TUBE TYPE

TR-900

RADIAL SOLUTION

TR-900

The TR-900 is Trelleborg's radial option for industrial application. Designed to withstand today's demanding applications and modern equipment, this radial tire offers better stability, traction and security with its unique tread pattern and reinforced sidewalls as compared to a conventional tire. It's special tread compound offers longer life and greater surface adhesion for superior traction.

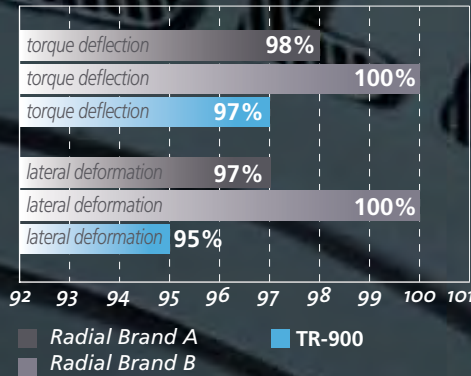

The TR-900 is ideal for applications with long runs. The radial construction allows for higher speed and a reduced heat build-up which helps to extend the life of the tire.

INCREASED STABILITY

The reinforced sidewall offers improved stability, safety and a comfortable ride. This tire is designed to handle sudden maneuvers such as sharp turns and abrupt braking.

The TR-900 optimizes vibration absorption for a smoother ride, reducing stresses on the machine, operator and load.

Sidewall deformation

Fuel consumption for 1000 working hours

ENERGY SAVINGS

The TR-900 tread compound features a low rolling resistance, which maximizes the energy efficiency, resulting in greater fuel savings.

Energy savings here is measured as gallons of fuel used during 1,000 working hours in the chart to the left.

LONGER TIRE LIFE

As compared to the conventional tire, the TR-900 tread design, radial construction and reinforced sidewall combine to extend the tire life and increase puncture resistance.

STABILITY

- A wide tread pattern for increased contact area.

EXTENDED TIRE LIFE

- Tread compound designed for longer life.

MAXIMUM UP TIME

- Radial technology to reduce punctures.

INCREASED COMFORT

- Radial technology for greater strength with pneumatic ride.
